1) It occurs to me that ~~making~~ the frontage road from Pages Lane extending as far North as possible should become the main corridor and reduce the speed limit on Main St to 25 MPH.

2) ~~Improve~~ Increase the number of crosswalks on Main Street

3) Improve evidence that a crosswalk indeed does exist

4) Perhaps the orange flags

Something must be done for today's and tomorrow's pedestrians

What specific concerns or problems do you see or anticipate on SR-106?

What about widening Main Street (Centerville from Parrish Lane to Chase Lane)? I live in the Pheasantbrook Condos. Along Main Street is our fence, then a narrow sidewalk, then a narrow "parking" strip. Where would the extra room come from? Losing the parking strip would put traffic right next to our fence & the sidewalk.

What other comments do you have about SR-106?

SR106 is not a very wide street - I can't imagine mass transit such as TRAX roaring down the street. The bus seems to be O.K.

Subject: SR 106 Main Street in Centerville

Dear Megan and Vern,

I attended the open house in Centerville this past month and have the following comments about the anticipated improvements along SR 106 which is Main Street in Centerville. I have served as City Engineer in Centerville for number of years and have experience in matter pertaining to utilities and infrastructure.

- 1) Please alert the planners and engineers working along SSR 106 that many utilities have been in place for over 50 years and they need to be analysed in depth before major improvement are contemplated. For example, Centerville City's water lines are old, encrusted cast iron pipes that are undersized for the new Safe Drinking Regulations. The City is preparing a Master Plan update for their Water Department wherein these lines are being considered for replacement. The storm drain systems are mostly corrugated metal pipes that need to be replaced. Your budgets should include such items where needed.
- 2) As you well know, SR 106 through Centerville is mostly 66 foot right of way. Widening efforts through our community would be costly and impact many homes and businesses. What ever is proposed, I recommended that widening of Main Street be a major consideration and strong negative impact against widening.
- 3) We all know that SR 105 Parrish Lane between I-15 and Legacy will be a major bottle neck unless something is done next year. This is not in the plan for Main Street but is one of the major concerns to Centerville.
- 4) I am vey much against Toll Roads. If they are considered I would like to tell you all the reasons why they cost more and are less efficient.

Please add these to your comments. Fred Campbell, PE City Engineer

I was disappointed with the lack of planning to move heavy trucks traffic from our main local freeways. The increase in truck traffic is a major element of our traffic difficulties

Centerville City Needs Your Opinion

Public Open Houses for Projects Affecting Centerville

Centerville residents and property owners should take note of the following opportunities to learn about and participate in several planning projects affecting Centerville:

UDOT Open House re: State Route 106 Study, April 11, 4:30 p.m. to 7:00 p.m. at Centerville City Hall

UDOT is conducting a planning level study for the S.R. 106 corridor, which runs through the cities of West Bountiful, Bountiful, Centerville and Farmington. The road is also known as Main Street in Centerville. At the Open House, project team members will be available to meet one-on-one with area residents, business owners and commuters to discuss their opinions and solutions regarding the S.R. 106 corridor. Among the issues under consideration are road width and alignment, traffic, safety, sidewalks and maintenance. For more information, please contact Megan James, UDOT Public Involvement Coordinator, at 801-965-3897 or mjames@utah.gov.

UDOT/UTA Open House re: South Davis Transit Study, April 17, 5:00 - 7:00 p.m. at Centerville City Hall; a brief formal presentation at 6:00 p.m.

Utah Department of Transportation and Utah Transit Authority have teamed to conduct a two-phase study to identify the best transit solution or solutions for South Davis County. The first phase is an Alternative Analysis that evaluates potential routes and transit modes. This phase has begun and should conclude in late 2007 with the identification of a Locally Preferred Alternative. The second phase will be a detailed valuation of impacts of the selected alternative. At the Open House, Centerville residents will learn about the study process and how the public is being involved. Residents can also comment on information gathered to date.

Main Street Corridor Planning Project Briefings, April 18 at Centerville City Hall, 8:00 a.m. and 6:30 p.m.

The Centerville City Council has initiated a study of the Main Street corridor, with emphasis on the Pages Lane to Parrish Lane segment. This will include a study of land uses, streetscape, building design standards, etc. Two briefing sessions (30-60 minutes) will be held on April 18. The 8:00 a.m. session will focus on business owners and the 6:30 p.m. session will focus on residents, but you may attend either session. Briefings will include an explanation of the project, introduction of the consultant and information about public participation opportunities.

SPRING Recreation Update

Looking for something fun to do this spring? Try a Dutch oven Class. Back by popular demand instructors Mike and Kim Bushey will be cooking up a storm at Founders Park every Friday evening at 7pm beginning April 13th – May 11th. Come learn the basics, plus bread baking, fancy desserts, one-pot meals and much more! Food and supplies provided. So bring your Dutch oven (one per person or couple) and get ready for some hands on fun! Class fee is \$50 per person or couple. Register on-line at www.centervilleut.net <<http://www.centervilleut.net/>> or at City Hall at 250 north Main Street.

Summer Recreation Classes are under construction with plans for some Super Summer Fun.

A Recreation flyer will be sent to all residents the first week in May.

On-line Registration is set to begin May 19.

The Recreation Department is now taking applications for Summer employment teaching Recreation classes i.e... Archery, Drawing, Water coloring, Arts and Crafts, Babysitting, Basketball, Cheerleading, Tumbling, Cooking, Soccer, Jewelry, Playschool, Scrap booking, Sewing, Tennis, Volleyball, Boy Scout Merit Badges and other general assistants. Those 16 years and older with skill and interested in working with children may pick up applications at City Hall in the Business office.

UDOT to Hold Public Meeting for S.R. 48 Corridor

Public is encouraged to attend

Salt Lake County – In order to better understand future transportation needs along the state Route 48 corridor, the Utah Department of Transportation will host a public open house for area citizens Thursday, April 19 from 4:30 p.m. to 7 p.m. at Copper Hills High School located at 5445 New Bingham Highway in West Jordan, Utah.

“S.R. 48 serves as one of the primary east-west corridor into southern Salt Lake County,” said Walt Steinvorth, UDOT Project Manager. “It’s important for us to speak with residents, commuters, and business owners about the future of the roadway.”

The meeting will be conducted in an open-house format. Project team members will be available to meet one-on-one with area residents, commuters, and business owners to discuss their opinions and solutions regarding the S.R. 48 corridor. As part of the corridor study, UDOT is looking at several aspects such as safety, sidewalks, maintenance, road width, alignment, and traffic.

The study area for S.R. 48 runs approximately 8 miles from Copperton on the west to Bangerter Highway in West Jordan. The purpose of a corridor study is to develop a shared vision of a specific section of highway, so that a long-term plan of improvements can be developed for the corridor. Corridor studies are high-level analyses and do not perform an in-depth look at impacts to the natural and man-made environments.

If area residents would like more information, please contact Megan James, UDOT Public Involvement Coordinator at 801-965-3897 or via email at mjames@utah.gov.

Public to weigh in on Centerville Main

Jenniffer Wardell

CENTERVILLE — Nearly everyone wants to hear what local residents have to say about the future of Main Street. To help with this process, three projects affecting Main will be holding open houses at Centerville City Hall during April. All residents are welcome and encouraged to attend.

"We want residents and businesses to be informed about what's affecting their city and how they can be involved in it," said Centerville City Manager Steve Thacker.

The first open house, scheduled for April 11 from 4:30-7 p.m., is a regional meeting UDOT is holding on State Route 106.

Beginning in West Bountiful, 106 is known as 400 North in Bountiful, Main in Centerville, and ends up as 200 East in Farmington.

Though this is not a traffic study, UDOT is asking for residents and local businesses to share their concerns about the road in topics such as intersections, roadway surface, safety conditions, and sidewalks.

For more information, please contact Megan James, UDOT public involvement coordinator, at 801-965-389 or mjames@utah.gov.

The second open house, scheduled for April 17 from 5-7 p.m., is for information and public comment on the South Davis Transit Study. The study is being handled by a separate group at UDOT.

"Mayor Russell asked UDOT and UTA to come to let residents know what the study is all about, what's happened so far, and what's coming up," said Thacker.

"This wasn't part of the original public involvement agreement, but people wanted to know what was going on."

The first phase of the study, set to be complete in late 2007, will evaluate potential routes and come up with a locally preferred alternative. Though a brief formal presentation will be held at 6 p.m., UDOT and UTA representatives will be available to answer questions and accept comment throughout the meeting.

The third open house, sponsored solely by Centerville City, is a set of briefings on April 18 that will discuss the Main Street Corridor Planning Project recently begun by the city. The briefings are in preparation for the public involvement period of the project, currently planned for May 10-12.

"We've had some people feel that we don't really want their comments on Main Street, or that we're waiting until the study is already done before getting them," said Thacker.

"The truth is, we've had some delays in the project and are only holding off the public involvement period until all the city council can be there. We want the public's ideas."

A briefing directed at local business owners will be held at 8 a.m., with another designed for residents set for 6:30 p.m. Each will last 30-60 minutes.

All are welcome to attend either briefing, which will explain the focus of the study and how the public can participate.

"We'll be able to answer questions about the process, but not about the final result," said Thacker.

"Until we get the chance to get the public's input, we don't know what that result is going to be."

For more information, see www.centervilleut.net.
